

Heart's Delight Gardens

These photographs, taken in August 1926, reveal the extensive formal gardens and arboretum that covered the east side of Heart's Delight Cottage drive. What a rainbow of color it must have been as guests drove by the flowers in full bloom! As a guest of the Miners you could also enjoy the miles of roads developed throughout the wooded acreage of the farm. Whether on the lawn or in the woods, the Miners delighted in the beauty that could spring from the native soil as well as the bounty it produced.
